

## Brush fire scorches an acre in Riverdale

Posted by [jgolson](#) February 14, 2009 16:59PM

A brush fire scorched about an acre of wooded land, within 100 feet of a housing development in Riverdale, authorities said.

No one was injured in the blaze that occurred at the end of Wesley Street, said Chief Michael Norton of the Riverdale Volunteer Fire Department.

Chief Gail Bresett of the Kinnelon Volunteer Fire Company was the first to notice the smoke and called it in at 1:15 p.m., Norton said. The fire contained to the wooded area located south of Route 23 and across from Home Depot, Norton said.

No one had to be evacuated, said Mayor William Budesheim. Firefighters from neighboring towns responded.

There are no hydrants in the area, and Kinnelon was the nearest water source, Norton said.

A camp fire may have sparked the blaze, Norton said. No one was in the area when officials arrived. Firefighters brought the fire under control and cleared the scene at about 4 p.m.

The E Coast Will continue to have a series of Events , That will look Natural but is not and it is . Theres an Energy Very Strong and visible to only a few . Count on the fact that the East Coast will continue to Act up .

Recall back on November, December when i mention

Whats goin on on the E Coast ? any one seen it . Was refering at the Land Actin up , from thru out the Entire Country only the E Coast had that type of visible changes ( to a few eyes)

This type of changes if start acting up the way im suspecting can affect quite a few different things besides the Movement of our Land .

Example : may be very well posible that can affect Lynhurst and Carstad in some ways . not in the Movement of our land . Can affect our Central Electric Towers ( Hopefully it wont go farther then that or We are screw Up for Big )

Is a Natural thing that is out of our hands out of our Tecnh to Stop or to understand .
